# Chapter 1: Installation

## Requirements

AreaCod411 requires BlackBerry® Desktop Manager and Device Operating System 3.6 or higher.

## Instructions

For installation, purchase and registration instructions see the [Installation Guide](#).

# Chapter 2: Using AreaCode411

## Starting AreaCode411

To start AreaCode411 select the application icon on the BlackBerry main screen and press the **ENTER** key or trackwheel to run it. You can also just press the letter “E” while the BlackBerry main screen is displayed to run AreaCode411.

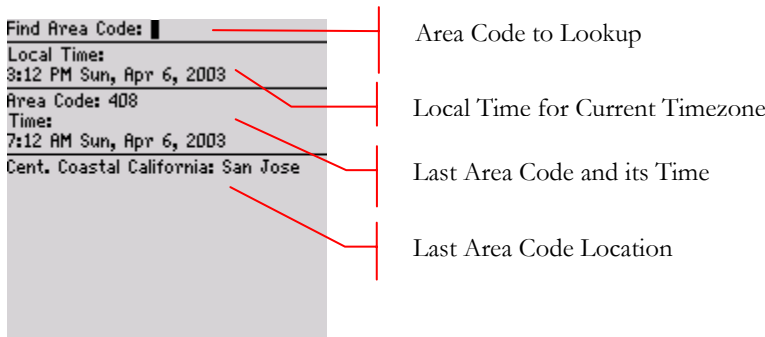

## Main AreaCode411 Menu

The main AreaCode411 menu is displayed by pressing the trackwheel while the main AreaCode411 screen is displayed. The following menu items are displayed:

Table 1: Main AreaCode411 Menu Items

Menu Item	Purpose
About / Register	Displays the About Screen, License Agreement and License Information.  The About Screen displays the application name and version number, copyright notice, and the web site and support addresses.
Close	Exits the application.

## Guide to the AreaCode411 User Interface

## Looking Up Area Code Information

Specify the area code for which you want to lookup information in the “Find Area Code” numeric field and press **ENTER**. The “Local Time” for your current time zone will be displayed, followed by the area code, “Time” and location for the area code you specified.

**IMPORTANT:** More than one time may be displayed for the area code as some area codes span more than one time zone. The displayed time for the area code may be off at certain times of the year as AreaCode411 does not account for Daylight Savings Time in the area code time zone(s).
